

Aspen Environmental Group

2024 Environmental Sciences and Planning Internship

Our ability to address complex environmental issues requires all voices to be heard. A diverse workforce in the environmental field is not just a major asset but is integral to developing comprehensive solutions that support all community members.

The **Environmental Sciences and Planning Internship Program** is designed to engage diverse students from groups that have been typically under represented from the environmental field, as these perspectives are essential to tackling environmental challenges within the communities where we live, work, and serve.

Who we are: Aspen Environmental Group is a dynamic, interdisciplinary environmental services firm that provides impact analysis, permitting, and compliance services for a wide variety of public and private clients. Aspen specializes in providing expert environmental services for complex, multi-faceted infrastructure and public works projects. We maintain a collaborative work environment that promotes multi-disciplinary collaboration and rigorous applied science.

Who you are: Aspen is looking for driven and passionate undergraduate or graduate students who are interested in a career in the environmental field. You have a positive attitude, with a willingness to learn and collaborate. You have a demonstrated passion and strong academic performance in a relevant field. You are excited to learn about the opportunities in the environmental field and are looking to add an internship to your resume.

Program summary: In addition to completing a traditional internship program, all interns will receive training and mentoring from various Aspen staff.

- **Internship will be 8 weeks during the summer months (July and August).**
- **Paid internship: \$22/hour**
- **Hours: Approximately 20 hours per week as determined by internal availability and company workload.**
- **This internship includes three tracks depending on intern's interests:**

Track 1: Environmental Sciences (Field and Remote) – Field studies with a choice of Biology, Cultural Resources (Archaeology), or Paleontology.

Track 2: Environmental Planning (Remote and In-office) – Writing environmental documents to comply with environmental laws, policies, and regulations.

Track 3: Geographic Information Systems (GIS) (Remote and In-office) – Preparing maps, using GIS, to support environmental analyses.

**Applications are due by
June 21, 2024**
